Renner opened the meeting.

- 1. Information Portfolio presentation was delivered by Karen Price, Marc Jewett, Fluor-B&W during the Waste Disposition Subcommittee meeting, the subcommittee went straight into discussion because the presentation was identical to the previous subcommittee presentation and everyone attended that meeting.**
- 2. Discussion:**

Question/Comment:	Answer:
Minter: EM makes million-dollar decisions every day. We have to have a plan so they keep giving us funding.	Simonton: Water and sewer will be needed for any business that would be interested in coming here. Water is needed in lots of industry, like food processing or paper mills, etc.

<p>The key is to create an opportunity. I have chased end uses for a long time. Every day I find an article about an opportunity that we missed.</p>	
<p>Francis: We need to work together and develop a vision for the future. I do not want to see us bullying DOE to do what we want. We have to negotiate the best deal we can. We have to make the hard decisions now.</p> <p>Build the roads now to get ready for opportunities. We need to have things aligned. We want Fluor to do the PR for us. We have a lot of work ahead of us. We can do it.</p>	<p>Roberts: How do you juggle the end use with the fact that there is a cleanup schedule? How do you get to the first step and finish at the same time?</p>
<p>Renner: We want Fluor to work for us, work for our future.</p>	
<p>Roberts: How long before the Canup study is complete?</p>	<p>Schneider: Soon, within a month at some point the Canup group will be willing to meet with the full board or subcommittee. They should have something ready in March.</p>

Renner: Meeting adjourned

Next meeting: Tuesday, March 13, 2012 at 6:30 p.m.
