

Environmental Cleanup & Land Preparation Subcommittee

Meeting Summary

October 11, 2011 • 4:30 p.m.

The Ohio State University Endeavor Center
1862 Shyville Road, Piketon, OH 45661

Subcommittee Members Present: Martha Cosby, Stan Craft, Frank Halstead, Brian Huber, Sharon Manson, and Cristy Renner

SSAB Members Absent: Michael Payton and Roger Scaggs

SSAB Members Present: Dick Snyder and Will Henderson

DOE Employees and Contractors: Greg Simonton, DOE; Rick Greene, RSI; Karen Price, Dennis Carr, and Pete Mingas, FBP

Liaisons: Maria Galanti, and Melody Stewart, Ohio Environmental Protection Agency (Ohio EPA) and Michael Rubadue, Ohio Department of Health

Support Staff: Julie Galloway, Cindy Lewis, and Eric Roberts, EHI

Public: Geoff Sea, SONG and Steve Shepherd, SODI

Renner opened the meeting.

Cleanup Level and Information Portfolio Rollout Plan Discussion– Karen Price:

Price reviewed some of the information about rollout Plan that was presented at the Board Meeting on October 6, 2011.

1. Discussion:

Question/Comment:	Answer:
Snyder asked is FLUOR looking for a recommendation by January 2012. How do you want this information? Who is going to make this masterplan?	Price stated Not really a recommendation, but something that says what kind of footprint you would like to be left. Roberts stated that DOE wants to know if they are going in the right direction. Price stated in the meeting summaries would be fine. Price stated the masterplan will be done by December.
Renner asks FLUOR is here for five	Simonton stated the sewer is DOE's responsibly

<p>years then maybe another five, if we take everything offsite that will take all the money. How do we know we will have money in ten years to finish anything they are promising us.</p> <p>What can we do to say how can we take this money and make it better, to make sure the money is here. I just want to make sure we get the funding in five years to finish.</p>	<p>there has to be a sewer we may take the money we are currently spending on it and build a new system. If we cleaned up the land without all the lines and everything, all you have left is prairie land.</p> <p>Roberts stated this has to make sense to DOE that they need it for the D&D. Your role isn't to develop the plan it is to keep DOE on line.</p> <p>Price stated we want to bring the SSAB along to ride shotgun on the ride from start to end. We do want a recommendation on the process D&D by February 2012 on a proposed path forward.</p>
--	--

Cleanup Alternatives – Fluor is going to do scenarios for all the cleanup levels

<p>Simonton asked Dennis was it you or Marc that said it might not be much more to cleanup to the next level from industrial cleanup standards.</p>	<p>Carr stated yes, you should cleanup to the next level standards if it does not take much more. We are working on that right now.</p>
<p>Roberts asked can we get that information a couple of days before our meeting so everyone can look at it before the meeting and be prepared</p>	<p>Price stated we will try to get it to you and if we cannot, I will let Simonton know so they can let you know ahead of time.</p>

2. Public Comment: **Sea** stated there was confusion the other night regarding SSAB and NHPA. So you know where NHPA comes in 1st on site structures is a Historical building which is the process buildings. 2nd is a proposal with all Scioto Township or Scioto and Lick. DOE has not been involved in all discussions about the site. 3rd DOE is removing a building which is a major undertaking. NHPA consulting parties needs to be consulted about what can be restored. Creek watersheds were altered during construction. 4th The area should be viewed as an asset. It is a habitat for Timber rattlesnakes, there have been siting reports. Keep in mind that the NHPA consulting parties will have another set of recommendations.

Next meeting November 9, 2011 (because of elections on our regular scheduled day).

Halstead Motioned to adjourn

Meeting adjourned
