RE: COMMUNITY SUPPORT FOR THE ENERGY PARK INITIATIVE AT THE PORTSMOUTH SITE

Dear Mr. Murphie:

Thank you so much for providing the southern Ohio community the opportunity to participate in meaningful and informed discussions related to environmental remediation and decontamination and decommissioning (D&D) activities. We are excited to be moving forward with the D&D project and developing a vision beyond the clean up for the southern Ohio workforce and community.

The purpose of this correspondence is to express the community's support for implementing the Office of Environmental Management's Energy Park Initiative at the Portsmouth Site. The D&D project is the ideal mechanism through which U.S. DOE can establish an Energy Park at the Portsmouth Site. It is our expectation that the D&D project objectives will accomplish this end use by creating reusable properties, preserving all site infrastructure, and preparing the Portsmouth Site for advanced energy and environmental technology projects, including but not limited to materials reuse and recycling, waste minimization and pollution prevention technologies, wind, solar, biomass, nuclear power, desalinization, geothermal, liquefied natural gas transfer stations, hydrogen generation, advanced energy research and development; and specialty component manufacturing capabilities for the advanced energy industry.

Support for this initiative is demonstrated by the signatures presented with this letter.

Sincerely,

Bobby Graff
President, USW Local 689

WASHINGTON, DC 20510

April 21, 2009

The Honorable Steven Chu
Secretary
U.S. Department of Energy
1000 Independence Ave., SW
Washington, DC 20585

Dear Secretary Chu:

Thank you for your leadership and dedication to the Department of Energy's (DOE) nuclear cleanup program and in particular for your recent efforts in Ohio.

As the Department establishes locations for the "Energy Park" program, it is important to continue to focus on leveraging existing DOE site assets as well as establishing a vision beyond cleanup for the workforce and community. DOE's Mound and Portsmouth sites are prime locations for energy parks and deserve careful consideration. Both sites offer the ability to utilize existing, one of a kind assets, including surplus federal properties, research capabilities, and highly trained work forces. As former active DOE nuclear facilities, they also meet the Department's objective of placing energy parks at existing or former DOE sites.

The Mound site is ready today to become an Energy Park. The Miamisburg Mound Community Improvement Corporation (MMCIC) has been active in redeveloping the site, having invested over \$20M in funds and created over 600 jobs. Today the site is home to 15 businesses employing over 300 people in fields that include emerging energy, advanced manufacturing, materials, and information systems.

The MMCIC has initiated discussions with the Department of Energy, Office of Energy Efficiency and Renewable Energy concerning the development of an Energy Park. The MMCIC has demonstrated the ability to successfully position the park to achieve the job creation mission and would serve as an ideal partner for DOE in establishing a premier energy park.

MMIC's vision for the Energy Park would be an expansion of the job creation success story that has already taken place at Mound, and would position DOE to further this success with state and regional resources to bring clean, reliable, and affordable energy technologies to market to reduce our dependence on fossil fuels and improve Americans' lives. The park would create a center that facilitates the development, demonstration, and integration of renewable, alternative, and green energies.

Since decommissioning, the Mound community has re-invented the site, positioned it to become a model for the reuse of these facilities across the country, and has started the process of assembling the team necessary to become a leader in energy advancements. The resources of the state and region to support

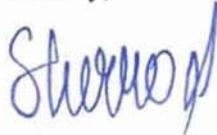

an Energy Park are significant and warrant consideration as you develop how best to support the country's energy independence efforts.

The Portsmouth site presents a different set of possibilities. As decommissioning and decontamination is set to begin soon, the community is actively engaged in developing the site for future reuse. This clean slate provides the Department the unique opportunity to craft a state of the art Energy Park utilizing the facilities at Portsmouth as well as the vast DOE land available at the site. As the cleanup ramps up, I ask that you work with the community and Ohio's Congressional delegation on establishing an Energy Park at Portsmouth.

The State of Ohio is dedicated to becoming the Silicon Valley of alternative energy. Its government, workforce, business, and education institutions are dedicated to making Ohio a world leader in alternative energy R&D, and manufacturing. Designating Mound and Piketon as energy parks would allow these sites to continue to serve our nation and utilize the resources the Department has invested in them over the last 60 years.

I appreciate the work and commitment the Department has made to the State of Ohio and I look forward to working with you on these important issues.

Sincerely,

Sherrod Brown
United States Senator

Thank you for all your help
with Mound and Portsmouth!
