**RE: COMMUNITY SUPPORT FOR THE ADVANCED TECHNOLOGY, OPERATIONS, AND
MANUFACTURING INDUSTRY CENTER (ATOMIC) FOR SCIENCE AND ENERGY
EDUCATION DEVELOPMENT IN SOUTHERN OHIO**

Dear Mr. Murphie:

Thank you so much for providing the southern Ohio community the opportunity to participate in meaningful and informed discussions related to environmental remediation and decontamination and decommissioning (D&D) decision making. We are excited to be moving forward with the D&D project and developing a vision beyond the clean up for the southern Ohio workforce and community.

The purpose of this correspondence is to express our support for developing the Advanced Technology, Operations, and Manufacturing Industry Center (ATOMIC) for Science and Energy Education Development in southern Ohio. It is imperative that we work together to develop a highly trained workforce in sufficient numbers to support the Energy Park Initiative and to build the capacity of the local community to become informed participants in US DOE's environmental decision making.

The ATOMIC program is designed to provide universal, site-wide training for the existing workforce, ensuring safe, secure, and efficient operations and continuity throughout the US DOE PORTS Site to protect human health and the environment, *and* to prepare the next generation for careers in advanced energy and environmental technologies, guaranteeing the success of the Energy Park Initiative at the Portsmouth Site.

The ATOMIC training program and facility will provide a competitive edge to the southern Ohio workforce because, regardless of the discipline or area of interest, these stackable and transportable training modules can be combined with other training, vocational education, or college degree programs, or they can be used as a stand-alone credential. The Ohio Skills Bank has been working hard to develop the Advanced Energy Curriculum, and the proposed ATOMIC brings it all together by establishing a formal partnership with the various educational institutions, the Ohio Skills Bank, United Steel Workers, and the US DOE PORTS Site contractors. Our region's ability to provide a well trained and highly skilled workforce is a key ingredient to implementing a successful reindustrialization program focused on new and emerging technologies in advanced energy, environmental technologies, and alternative energy research and development.

Support for this initiative is demonstrated by the signatures presented with this letter.

Sincerely,

Bobby Graff
President, USW Local 689

Jennifer Chandler
Executive Director, SODI

Dear Ms. Chandler:

Letter of Support

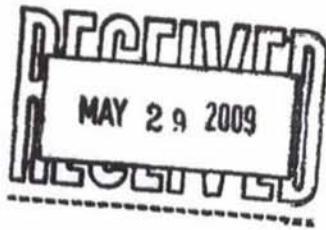

The purpose of this letter is to express our full support of SODI's proposal to develop the Advanced Technology, Operations, and Manufacturing Industry Center for Science and Energy Education Development. The proposed training program and facility will provide a competitive edge to the southern Ohio workforce because regardless of the discipline or area of interest, these stackable and transportable training modules can be combined with other training, vocational educational, or college degree programs, or they can be used as a stand-alone credential.

We are excited to participate in this project because not only will the result be a highly trained workforce in sufficient numbers to support the Advanced Energy and Environmental Technology Hub of Ohio, but it will provide universal, site-wide training for the existing workforce, ensuring safe, secure, and efficient operations and continuity throughout the US DOE reservation in protecting human health and the environment. We are committed to work with the partners to identify the training modules that can be consolidated with similar modules being conducted by other contractors for the same purpose and offered universally to all site personnel, to utilize the program and facilities to train our own staff, and to endorse an advanced energy curriculum that will be used to train personnel to work at the US DOE PORTS site and in the advanced energy industry.

Sincerely,

Wray Jordan
General Manager

Dear Ms. Chandler:

The purpose of this letter is to express our support of SODI's proposal to develop the Advanced Technology, Operations, and Manufacturing Industry Center for Science and Energy Education Development.

Endorsement of training programs and the purposed facility to support the Advanced Energy and Environmental Technology Hub of Ohio in our community are welcomed.

Sincerely,

Daniel W. Rogers

Subject: Support Of SODI Proposal

Dear Ms. Chandler:

The purpose of this letter is to express UDS' support of SODI's proposal to develop the Advanced Technology, Operations, and Manufacturing Industry Center for Science and Energy Education Development. The proposed training program and facility will provide a competitive edge to the southern Ohio workforce. Regardless of the skills or area of interest, these stackable and transportable training modules can be combined with other training, vocational education, or college degree programs.

We are pleased to participate in this project as it can develop a highly trained workforce in sufficient numbers to support the Advanced Energy and Environmental Technology Hub of Ohio, as well as providing universal, site-wide training for the existing workforce. This will assist in ensuring safe, secure, and efficient operations throughout the US DOE reservation. We are committed to working with the site partners in identifying potential training modules and in utilizing the program and facilities to train our own staff. We endorse this advanced energy curriculum and its use to train personnel for work at the US DOE PORTS site and in the advanced energy industry.

Respectfully,

Paul B. Kreitz
President/Project Manager

**Contract No. DE-AC24-05OH20193: Letter of Support for Proposed Regional Training Center
Federal Stimulus Program**

Dear Ms. Chandler:

The purpose of this letter is to express Theta Pro2Serve Management Company's, LLC (TPMC) support of the Southern Ohio Diversification Initiative's (SODI) proposal to develop the Advanced Technology, Operations, and Manufacturing Industry Center for Science and Energy Education Development. The project, as proposed, will offer a curriculum and support facilities for training programs that will provide a competitive edge to the southern Ohio workforce by way of offering stackable and transportable training modules that can be combined with other training, vocational education, or college degree programs. These training programs can be used as stand-alone credentials for both the existing Portsmouth Gaseous Diffusion Plant (PORTS) workforce and/or for future employee candidates as job/opportunities are developed at PORTS.

TPMC, a dedicated contractor managing infrastructure activities for the U.S. Department of Energy (DOE) for PORTS, is pleased to support the establishment of a Regional Training Center to train personnel in the advanced energy industry.

Sincerely,

Clarence W. Sheward
